VM-payment-saferpay for vm2.0

$79.00

Saferpay - the easy way to pay, we just released a new payment method for saferpay, it's a standard joomla plug, you can install it at joomla backend easily, it support the latest virtuemart2.0; the default price is for one domain license, if you want to more license or service, please contact me via my email : joomvm@gmail.com .

The following is the installation steps for VM - Saferpay :

1. Go to the joomla backend - Extensions - Extension Manager,install the package directly.

2. Go to the joomla backend - Extensions - Plug-in Manager, find out the item - "VM - Payment, Saferpay". choose it and enable it.

ï¿½ï¿½ï¿½type=image,width=31.75,height=30.69166666666 90.00,0.0,87.00,28.35,470.99 cm /I2 Do Q

3. Go to the virtuemart backend - Shop - Payment Methods - New, into the New page for payment method, in the "Payment Method Information", choose the "Payment Method" - "VM - Payment,Saferpay", then Save this page, after that you can click the tab - "Configuration", in this page,there are two situation :

A . Test mode - you just need to click the option - "Yes", then leave other parameter as default value,then you can test this payment method in the vm front-end.

B . Real mode - You need to click the option - "No" , then input "Your real accountId" in related textbox, then click the "Save" button to save your info. (warn : Please dont change the parameter : "SaferPay Hosting URL")

That's all .
